

Healthcare Intelligence Platform

Complete System & Workflow Blueprint

Healthcare Intelligence Platform (HIP) • Complete System Workflow Guide

This document describes the complete functional, technical, and data workflows of the Healthcare Intelligence Platform (HIP).

...

1. Architecture Pipeline

The diagram below represents how the React client, Express API, Middleware router, and Dual-Mode database interact.

...

2. Core Functional Workflows

HIP is designed around three main clinical and financial workflows.

Workflow A: Front Desk Patient Intake & Queue Assignment

...

Workflow B: Lab / LIMS Workflow

...

Workflow C: Invoicing, Payments & Auto-Queuing

...

3. Database Schema Relationships

The diagram below highlights the foreign keys and core associations.

...

4. Interactive Workflow Page in the Dashboard

We have built a dedicated **System Workflow** page inside the platform!

To view it:

1. Log in to the application at **`http://localhost:3001/`**
2. In the left-hand navigation sidebar, click on **System Workflow** (the book icon **📖**).
3. The page allows you to:

- Click on nodes in the live Architecture Diagram to inspect the underlying technology, stack, and security settings.
- Read step-by-step processes for Patient Intake, Triage, LIMS, and Billing.
